

bOnline | Junior front-end developer assessment

Congratulations!

Thank you for your submission to the **Junior front-end developer** position, you have been selected to continue with our project assessment process. This brief will explain a simple project which we would like you to complete by **the due date on email**. You will find all the details you require below to complete this task.

Objective

Using your own code and creativity we would like you to create a VueJS webpage. You have been provided with both the design and data to develop this project.

Deliverables:

- A functional webpage of the designs
- The page must display the provided data
- A keen eye for details throughout the design
- Clean & concise code
- Reusable and well thought out code

NB* We would prefer this to be a VueJS project
(If you don't know how to use Vue, any attempt at it will be appreciated)

Optional extras:

- Storing the data in a store
- Loading states
- Creative UI animations

What will we be looking out for:

- Your ability to flatten multi-dimensional data
- Understanding of VueJS
- HTML & SASS code
- Use of components
- Responsive development without design
